

MTT SPORTS White Paper

The official MTT SPORTS white paper, latest updated in August 2025.

Note: As MTT SPORTS is currently in the public testing phase, it is important to note that the content of this white paper may be modified in the future to reflect the platform's commitment to development and improvement.

Overview

1.1 MTT Network

The MTT Network Chain is a public blockchain built on the Cosmos SDK, fully compatible with the EVM. It is designed to provide highly secure, scalable, and interoperable blockchain infrastructure for esports-focused applications, offering a robust foundation for decentralized competitive gaming.

1.2 MTT SPORTS

MTT SPORTS is a decentralized online Texas Hold'em multi-table tournament (MTT) platform built on the MTT Network Chain. It is positioned as a **fair competition platform** rather than an online gambling platform. Upholding the principles of **fairness, transparency, and integrity**, it focuses solely on MTT tournaments and does **not** provide gambling-oriented game modes such as cash games.

The platform aims to promote the professionalization, tournament standardization, and global development of Texas Hold'em, with the ultimate vision of making MTT tournaments a world-class sports brand comparable to the **PGA (golf)**, **F1 (Formula 1)**, and **FIFA (football)**.

Empowered by Web3 technology and decentralized governance, MTT SPORTS will deliver an unprecedented poker competition experience for global players, building a tournament ecosystem governed, developed, and benefited by the community.

1.3 MTT & MTTD — Evolving from a Single-Token to a Dual-Token Model

In the early stage of MTT SPORTS, a single token (MTT) was used to handle in-game value transfers, tournament rewards, item purchases, and more. However, as the platform grew, this model revealed several limitations:

- **Value Function Overlap:**
MTT functioned both as a utility token for gameplay and as a governance/rights token expected by the community. This overlap meant price volatility directly affected operations, causing instability and impacting player benefits, with no effective macro-control tools.
- **Lack of Long-Term Governance & Community Binding:**

The single-token model lacked a dedicated governance token to represent voting rights and revenue-sharing entitlements, making it hard to incentivize long-term participation.

- **Rising Need for Decentralized Governance:**

As the ecosystem expanded, transitioning from a platform-led to a community-governed model required a governance token for voting and reward distribution.

- **The solution:** a dual-token economy:

- **MTT:** Utility token for tournament entry fees, item purchases, and rewards (see section 5.2).

- **MTTD:** Governance token for revenue sharing, voting, and community incentives (see section 5.3).

This upgrade strengthens MTT SPORTS' economic sustainability and community-driven development, offering long-term value to global players and token holders.

1.4 Texas Hold'em Poker

1.4.1 Introduction

Texas Hold'em originated in early 20th-century Texas, USA, and has grown into the world's most popular form of poker. While it began in private games and casinos, it entered the global stage in the 1970s when it became the main event of the **World Series of Poker (WSOP)**.

Major tournaments:

- **WSOP:** Established in 1970, the most prestigious poker event worldwide. Its Main Event is considered poker's "world championship."
- **EPT (European Poker Tour):** Founded in 2004, a top European poker tour attracting players from around the world.
- **APT (Asian Poker Tour):** A rapidly growing Asian tour that draws increasing numbers of international competitors.

1.4.2 Texas Hold'em Market

The global poker market is worth tens of billions of USD annually, with online poker generating several billion dollars per year.

- North America: ~60% market share, dominated by PokerStars and WSOP.com.
- Europe: ~25–30% market share, with partypoker and 888poker leading.
- Asia: ~10–15% and rapidly growing.

1.4.3 Tournaments vs. Cash Games

Skill & Strategy Focus:

MTT tournaments require sustained strategy, skill, and discipline to outperform hundreds of opponents over many hands. Unlike gambling formats that depend on short-term luck, tournaments emphasize player decision-making and consistency.

A 2012 Cornell University study (Kyle Siler, *Journal of Gambling Studies*) found:

- Single-hand outcomes are over 70% influenced by luck.
- Over 1,000+ hands, skill becomes the dominant factor.

Key differences include:

- **Emotional Control:** Players must stay composed under uncertainty, making optimal decisions despite pressure.
- **Logical & Mathematical Reasoning:** Quick probability assessment and opponent hand reading are critical.
- **Strategic Play:** Reading betting patterns and psychological cues to adapt strategy.
- **Risk Management:** Balancing chip preservation with profit maximization.
- **Bankroll Management:** Allocating resources wisely to maintain long-term competitiveness.

These qualities make Texas Hold'em both a competitive sport and an intellectual challenge, attracting millions of players globally.

Getting Started

Step 1 – Access MTT SPORTS

Visit the official [MTT SPORTS](#) website directly from your browser — no app download required. Simply click to start playing.

Step 2 – Create an Account

Register with your email or mobile number. You'll receive a verification code — enter it to complete your registration and access MTT SPORTS.

Step 3 – Your Wallet

Upon registration, the system automatically generates an exclusive MTT SPORTS wallet for you. This wallet securely stores your digital assets.

Step 4 – Acquire MTT Tokens

You can obtain MTT in the in-app **Marketplace** using USDT, or transfer MTT from another wallet to your MTT SPORTS account.

Step 5 – Join a Tournament

Ensure you have enough MTT in your wallet to pay entry fees and participate in tournaments.

(Tip: A beginner's video or step-by-step illustrated guide can be embedded here to help first-time players.)

MTT Network Chain

3.1 Introduction to MTT Network

Network Name	Mtt Network
--------------	-------------

Network URL	https://evm-rpc.mtt.network/
Chain ID	6880
Currency Symbol	MTT

For more technical and operational details, please refer to the [MTT Network White Paper](#).

MTT SPORTS

MTT SPORTS is a native blockchain application on the MTT Network. It can be accessed from any web browser on both personal and enterprise devices, without the need to download or install a client.

Image 4.1 MTT Sports Home

4.1 Tournament System

MTT SPORTS hosts multiple official tournaments daily. Prize pools are funded from two sources:

- A pre-allocated MTT token reward budget provided by the platform.
- Entry fees paid by players.

Players can freely choose tournaments based on their schedules. As the ecosystem expands, both the official team and the community will continue to introduce more diverse formats and innovative gameplay, further enriching the user experience.

4.1.1 Entry Fee Allocation

Tournament entry fees are split into:

- **Prize Pool Funds:** A portion goes directly into the prize pool for distribution to winners.
- **Platform Revenue:** The remaining portion is allocated to the MTT SPORTS treasury to support operations, ecosystem incentives, and platform maintenance.

4.1.2 Prize Distribution

After each tournament, players who finish “in the money” (ITM) receive proportional rewards from the prize pool based on their final ranking. This system both sustains platform operations and incentivizes active participation.

4.1.3 Tournament Rewards

In addition to distributing MTT tokens, MTT SPORTS has allocated **100 BTC** for BTC-special tournaments, boosting the platform’s competitiveness and visibility.

The reward system is designed to be highly scalable — supporting multiple mainstream crypto assets such as ETH, BNB, and SOL as rewards for special events. This diversification strengthens cross-chain adoption and facilitates multi-chain asset circulation on the platform.

The screenshot displays the MTT SPORTS platform interface. On the left is a navigation menu with options like Home, Newbie, Tourney, Club, MTT Sports, News, Beginner's Guide, Ranking, BTC Zone, Marketplace, Mail, Promotion, Wallet, Ticket Wallet, My Games, VIP Center, Identity Verification, and Feedback. The main content area is divided into two panels. The left panel, titled 'Prize Pool', shows a table of prize distribution for a tournament with 57 winners. The right panel, titled 'Satellites', lists several 'Tickets to BTC Main Event' with registration status, ticket counts, and a 'Register' button.

Place	Prize
1	0.2
2	0.1
3	0.07
4	0.05
5	0.03
6-7	0.02
8-9	0.01
10-11	0.008
12-15	0.007
16-20	0.006
21-25	0.005
26-35	0.004
36-45	0.0036

Image 4.2 Tournament Prize

4.2 Marketplace & Store

4.2.1 Store

The MTT SPORTS store offers a wide variety of virtual in-game items, including tournament tickets, voice packs, interactive props, and gifts. Players can purchase these with MTT tokens to enhance their gameplay experience.

By integrating these items into the ecosystem, MTT SPORTS increases user engagement, immersion, and the real utility of MTT tokens, creating a stronger value loop.

Image 4.3 MTT Sports Mall

4.2.2 Marketplace

The platform features a decentralized order-book marketplace where players can freely trade NFT tournament tickets. Built on blockchain smart contracts, it ensures transactions are transparent, immutable, and trustless, with full support for order placement, matching, and execution.

Image 4.4 MTT Sports Market

4.3 Fair Play Mechanisms

4.3.1 RNG Card Dealing System

Fairness in online poker starts with the dealing process. MTT SPORTS uses a **Verifiable RNG**

(Random Number Generator) mechanism that allows players to participate in shuffling and verify its fairness. Cards are dealt based on all players' inputs, ensuring unbiased and provable randomness.

Image 4.5 RNG

4.3.2 Facial Recognition

Facial recognition technology ensures all participants are real humans, not bots, preserving game fairness and experience quality. As blockchain verification evolves, MTT SPORTS will continue to refine identity verification to maximize fairness.

Image 4.6 MTT Sports Verification

4.4 Ladder Ranking System

Player rankings are determined by performance across all completed tournaments. Points are earned based on prize pool size and tournament results — larger prize pools yield more points. Higher rankings increase recognition within the poker community and serve as an industry-recognized proof of skill.

Image 4.7 MTT Sports Ladder Ranking

4.5 Security System

MTT Network's smart contracts have been audited.

MTT SPORTS supports multiple security verification methods — including email, mobile, password, Google Authenticator, and biometric keys — to safeguard user assets and accounts.

Important: Never share your verification codes or authenticator keys with anyone, including the MTT SPORTS team. Only scammers will request such information.

Image 4.8 MTT Sports Security Center

4.6 Customer Support

The platform offers a multi-channel, high-efficiency support system:

- **Ticketing System:** Built-in support ticket system for reporting and tracking issues until resolution.
- **Multi-Language Support:** Available in 20 major languages, including English.
- **Community Support:** Official Telegram and Discord communities for peer help, feedback, and governance participation.
- **AI Customer Service:** 24/7 automated assistance for FAQs, process guidance, and ticket submission.

4.7 PWA (Progressive Web App)

To optimize the mobile experience, MTT SPORTS offers a PWA version accessible directly from a browser without downloads. It delivers fast loading, offline access, and native app-like performance, with tailored enhancements for touch interaction, network optimization, and tournament participation.

4.8 Clubs

Clubs are a vital link between the platform and its community, enabling localized event operations and revenue sharing.

4.8.1 Creating a Club

Users can apply to create clubs by staking MTT tokens and submitting relevant information for review. The staked amount is refunded if the club is dissolved — the platform charges no creation fee.

Image 4.10 Create Club

4.8.2 Club Features

- **Independent Websites:** Each club gets its own domain (not a subdomain of sports.mtt.xyz) and can run independently via PWA.
- **Custom Development:** Club owners can develop unique features for their members.
- **Event Management Tools:** Professional tools for smooth operations and user retention.

Image 4.11 Club Home

4.8.3 Club Revenue

Following the “empower clubs” principle, only 1% of entry fees from club-hosted tournaments go to platform maintenance — the remaining 99% is split between the club and the prize pool.

Tokenomics

5.1 Economic Loop Overview

Image 5.1 Economic Loop Overview

MTT Value Flow:

- **Acquiring MTT:** New players obtain MTT via promotional incentives or official purchase channels.
- **Spending MTT in Tournaments:** Players use MTT to pay tournament entry fees, earning **airdrop points** in the process.
- **Converting Airdrop Points to MTTD:** Airdrop points determine how many MTTD governance tokens a player will receive during each distribution cycle.
- **Using MTTD:** MTTD can be sold on secondary markets or held to earn governance rights and platform revenue shares.

MTTD Value Flow:

- **Acquisition:** Earned via the airdrop program or purchased directly on secondary markets.
- **Revenue Sharing:** Holders receive proportional distributions from MTT SPORTS' operating income. Distribution amounts and schedules are decided via governance voting.
- **Governance Rights:** MTTD holders vote on major decisions — such as revenue share percentages, payout frequency, and significant product changes.
- **Continuous MTT Use:** Players keep spending MTT for tournament entries, sustaining the competitive and economic loop.

5.2 MTT

5.2.1 What is MTT?

MTT is the native token of the MTT Network and the primary in-game currency for MTT SPORTS. It powers tournament entry, in-game purchases, rewards, and ecosystem participation.

5.2.2 Price Stability Mechanism

MTT liquidity is managed via an official market-making mechanism, keeping prices between **0.05 USDT** with $\pm 1\%$ fluctuation. This stability reduces speculative volatility and ensures a consistent user experience.

5.2.3 Core Utilities

- **Network Fees:** Pay gas fees for transactions and smart contract calls on MTT Network.
- **Tournament Entries:** Most poker tournaments on the platform require MTT for entry.
- **Rewards:** Used for tournament prizes, referral bonuses, and community incentives.
- **Staking:** Stake MTT to participate in consensus, earn rewards, and support governance.
- **Marketplace Purchases:** All store items (tickets, props, gifts, language packs) are priced in MTT.

5.2.4 How to Get MTT

- **Tournament Rewards:** Earned by placing in official or private club events.
 - **Referral Commissions:** Invite friends to join via a unique code and earn MTT based on their winnings.
 - **Staking Rewards:** Stake MTT to earn yield plus your principal back after the staking period.
 - **Validator Mining:** Become a network validator via PoS consensus to earn gas fees and block rewards.
-

5.3 MTTD

5.3.1 What is MTTD?

Image 5.2 MTTD Tokenomics

MTTD (MTT DAO) is an ERC-20 governance token issued on the MTT Network, with a fixed total

supply of **21,000,000**. Holders participate in governance votes and share in platform revenues.

Core Goals:

- **Long-Term Player Incentives:** Reward players who engage deeply in the ecosystem and hold MTTD.
- **Decentralized Governance:** Gradually transfer decision-making power from the core team to the community.

5.3.2 Token Allocation

MTTD supply is split equally into three parts (1:1:1):

- **Investors – 33.33% (7,000,000 MTTD):** Early backers, with lock-up and linear vesting.
- **Foundation – 33.33% (7,000,000 MTTD):** For team rewards, ecosystem expansion, partnerships, marketing, and user growth.
- **Airdrop – 33.33% (7,000,000 MTTD):** For rewarding early adopters, active community members, and tournament participants.

5.3.3 Vesting Schedule

Category	%	Amount	Token Generation Event (TGE)	Linear Unlock/Month
Investors	33.33%	7,000,000	0%	18 months
Foundation	33.33%	7,000,000	0%	18 months
Airdrop	33.33%	7,000,000	0%	18 months

Release Structure:

- Quarter 1: 10% of total supply.
- Quarters 2–5: 5% per quarter.
- Quarter 6: 3% of total supply.
- Total Vesting: 18 months (6 quarters).

5.3.4 Unlock Timeline:

The MTTD token unlock schedule will be strictly implemented as shown in the table below. Community members can monitor the process via the publicly disclosed wallet addresses. The table illustrates the cumulative token release curve over the 18 months following issuance.

Date	Investors	Foundation	Airdrop
------	-----------	------------	---------

October 2025	2,100,000	2,100,000	2,100,000
January 2026	1,050,000	1,050,000	1,050,000
April 2026	1,050,000	1,050,000	1,050,000
July 2026	1,050,000	1,050,000	1,050,000
October 2026	1,050,000	1,050,000	1,050,000
January 2027	700,000	700,000	700,000

- Oct 2025: 1,750,000 each (Investors, Foundation, Airdrop).
- Jan 2026 – Jan 2027: 1,050,000 each per quarter until fully vested.

5.3.5 How to Get MTTD

- **Airdrop Rewards:** Participate in tournaments to earn points that determine MTTD allocation.
- **Secondary Market Purchase:** Buy MTTD directly from exchanges.

5.3.6 MTTD Buyback Program

After all MTTD airdrops are distributed, the platform will continue supporting its long-term value by allocating part of its operational revenue to buybacks. The revenue split between buybacks and holder rewards will be decided via governance voting.

Community Building & DAO Governance

6.1 DAO (Decentralized Autonomous Organization)

6.1.1 veMTTD Governance Token

MTT SPORTS DAO is governed by holders of **veMTTD**, which is obtained by staking MTTD.

- The **longer** the staking period, the **more veMTTD** is received, increasing governance voting power.
- veMTTD is **solely** used for governance and carries no direct monetary value.

How It Works:

Staking MTTD:

- Users lock MTTD for a self-selected period.
- Longer lock = more veMTTD, thus more voting weight.

- Example: Staking 10,000 MTTD for 1 year grants 11,000 veMTTD.

Voting Power:

- Voting weight = veMTTD balance.
- veMTTD holders can submit and vote on governance proposals.

Unlocking:

- When the staking period ends, users may withdraw their MTTD.
- Upon withdrawal, the corresponding veMTTD is destroyed.

6.1.2 DAO Operational Structure

Image 6.1 MTT DAO Governance Process

Governance & Decision-Making Committee

- Sets DAO's strategic direction and core rules.

- Evaluates community proposals and manages the voting process.
- Oversees execution of approved initiatives.

Ecosystem Development & Operations Committee

- Drives ecosystem growth and manages daily platform operations.
- Allocates resources to projects and ensures proper implementation of approved proposals.

Foundation & Treasury Management Committee

- Manages platform funds, token distribution, and financial expenditures.
 - Ensures financial transparency and publishes regular reports.
-

6.1.3 The Foundation

The MTT SPORTS Foundation is an independent non-profit entity with the following responsibilities:

- **Technology Innovation:** Fund and support core MTT Network development, including security, performance, and cross-chain capabilities.
 - **Community Development:** Promote global community engagement through events, hackathons, and incentive programs.
 - **Education & Promotion:** Create learning resources (docs, tutorials, video courses) and increase global awareness via media campaigns.
 - **Partnerships:** Establish collaborations with blockchain projects, enterprises, academic institutions, and governments.
-

6.1.4 The Treasury

The Treasury is the ecosystem's financial backbone, funding long-term growth and operational stability. Initially managed by the Foundation, it is used to:

- **Sponsor Tournaments:** Fund prize pools to attract players and boost participation.
- **Reward MTTD Holders:** Share part of platform revenue with MTTD holders.

Revenue Sources:

- **Tournament Entry Fees:** A percentage of all MTT SPORTS entry fees goes to the Treasury.
- **External Partnerships & Sponsorships:** Revenue from collaborations, ads, and co-branded events.
- **Marketplace Fees:** Commission from NFT and item trades in the MTT SPORTS Market.
- **Ecosystem Project Dividends:** Revenue shares from DApps and other projects within MTT Network.
- **Community Donations:** DAO-approved donations from supporters.

Roadmap

2023 – Fundraising & Mainnet Development

- **Q3 2023:** Announced the launch of the MTT Network blockchain project.
- **Q4 Oct 2023:** Secured \$10M in funding.
- **Q4 Nov 2023:** Released MTT Network Mainnet Alpha, integrating the Cosmos SDK framework.

2024 – Tournament Platform Launch

- **Q1 Jan 2024:** Mainnet Beta release with EVM smart contract compatibility.
- **Q1 Mar 2024:** MTT SPORTS mobile platform launched and stabilized on both major platforms.
- **Q2 Apr 2024:** Mainnet node testing completed — full mainnet operational.
- **Q2 Jun 2024:** MTT SPORTS integrated with MTT Network; on-chain data testing successful.
- **Q3 Aug 2024:** Launch of multiple tournaments, with the One BTC (BPT) series gaining major community attention.
- **Q3 Sep 2024:** Brand presentation at Token2049; community onboarding; Alpha stress test of MTT SPORTS.
- **Q4 Oct 2024:** Release of MTT Network White Paper 1.0.
- **Q4 Nov 2024:** Announcement of the MTT SPORTS Global Tournament Plan and Global Recruitment Campaign for MTT Network.

2025 – Full Mainnet Launch

- **Q1 Jan 2025:** Validator recruitment completed; full node deployment for MTT Network.
- **Q1 Mar 2025:** MTT SPORTS concurrent player count exceeds 10,000.

Team

MTT Network was founded by an experienced anonymous team with deep expertise in blockchain, poker game development, and artificial intelligence. The team includes blockchain pioneers, top Texas Hold'em product developers, and seasoned global event organizers.

Official Information Channels:

- **Website:** <https://mtt.xyz/>
 - **X (Twitter):** https://x.com/mtt_sports
 - **Discord:** [MTT SPORTS Discord]
 - **GitHub:** <https://github.com/mttsports>
 - **Telegram Group:** https://t.me/mtt_sports
-

Glossary

- **EVM (Ethereum Virtual Machine):** Virtual execution environment supporting Ethereum-compatible smart contracts.
- **Unbonding Period:** Time required to regain control over MTT tokens after initiating unbonding.
- **Transaction Fees:** Fees paid for transactions on MTT Network, distributed to validators and delegators.
- **Commission Fee:** Validator's service fee, deducted from transaction fees.
- **Double Signing:** A malicious act where a validator signs blocks on two different chains simultaneously.
- **VRF (Verifiable Random Function):** A cryptographic method for generating provably fair random numbers.
- **GAS:** Transaction fee on MTT Network for computation and validation.
- **RNG (Random Number Generator):** Algorithm for generating random numbers, used in gaming and cryptography.
- **MTT in Poker (Multi-Table Tournament):** Poker format with players distributed across multiple tables.
- **PWA (Progressive Web App):** Web-based application with native app-like experience, installable via browser and usable offline.
